Referral Kerry Adams, Detail Electrical

Kerry has been installing and maintaining our industrial equipment for approximately 7-8 years now. He has always been professional, honest, and reliable, while charging a reasonable price for his services.

Kerry's largest and latest install for us in 2009 was for the full fit out of our new 2000 m² Manufacturing facility. This was a difficult fit out as we installed typical office trunking and equipment into a manufacturing environment in order to achieve a desired look. The end result was fantastic, with a very professional look as the photos show. This demonstrates how Kerry is able to think outside the square.

I would highly recommend Kerry and his team to anyone.

Please do not hesitate to contact me if there are any questions.
